**BID # 186887LC**  
Newtown & Fruitville Master Lift Station Rehabilitation

**ADDENDUM NO. 5**

The following represents clarification, additions, deletions, and/or modifications to the above referenced bid. This addendum shall hereafter be regarded as part of the Bid. Items not referenced herein remain unchanged, including the response date.

**Part I - Pertaining to the Solicitation Package:**

~~Bid Opening October 3, 2018~~

**Bid Opening October 17, 2018**

~~Bid Form~~

**Revised Bid Form**

**Part II – Pertaining to the Technical Specifications / Scope of Work:**

Specification Section 01200, Article 2.01: Insert the following paragraph as Newtown Electrical Service Allowance.

**Newtown Electrical Service Allowance—The Contractor will submit for reimbursement all direct costs associated with the coordination, installation, and connection of the new Electrical Service at the Newtown Station. This Bid Allowance includes the labor and materials associated with the new service including but not limited to the following: connection fees, trenching, directional drilling, conduit, conductors, backfill, compaction, hand holes, and testing of new service conductors.**

**Part III – Responses to Questions:**

1. Question: Addendum 3, question 1 seems to reference the Fruitville station, not the Newtown station. The Newtown electrical service shown on LS1-4 (see note 15) identifies P100 as a NEW circuit and to install from a “box” located at the northwest corner of the lift station to the new meter location.

Answer: Since the present condition of the existing service, conduit(s), and conductors has not been evaluated, the County requires a new service to the station. Newtown Electrical Service Allowance has been included on the revised Bid Form. The direct costs associated with the new service will be reimbursed under this allowance, eliminating the need for the Bidders to address the new service elsewhere.
