Application for Permit by:

Collier County Regional Water Treatment Plant
Howard Brogdon, Water Director
3339 East Tamiami Trail, Suite 303
Naples, FL 34112
Howard.Brogdon@colliercountyfl.gov

DEP File No: 365281-131-DS/C
County: Collier
Project Name: 98th Ave North & 99th Ave
North Water Main Replacement
Project
PWS ID: 5114069

NOTICE OF PERMIT ISSUANCE

Enclosed is Permit Number 365281-131-DS/C to construct the subject water main improvements, issued pursuant to Section 403.861(9), Florida Statutes.

NOTICE OF RIGHTS

This action is final and effective on the date filed with the Clerk of the Department unless a petition for an administrative hearing is timely filed under Sections 120.569 and 120.57, F.S., before the deadline for filing a petition. On the filing of a timely and sufficient petition, this action will not be final and effective until a subsequent order of the Department. Because the administrative hearing process is designed to formulate final agency action, the subsequent order may modify or take a different position than this action.

Petition for Administrative Hearing

A person whose substantial interests are affected by the Department's action may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. Pursuant to Rules 28-106.201 and 28-106.301, F.A.C., a petition for an administrative hearing must contain the following information:

- (a) The name and address of each agency affected and each agency's file or identification number, if known;
- (b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;
- (c) A statement of when and how the petitioner received notice of the agency decision;
- (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
- (e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action;
- (f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
- (g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

The petition must be filed (received by the Clerk) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov. Also, a copy of the petition shall be mailed to the applicant at the address indicated above at the time of filing.

Time Period for Filing a Petition

In accordance with Rule 62-110.106(3), F.A.C., petitions for an administrative hearing by the applicant and persons entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of receipt of this written notice. Petitions filed by any persons other than the applicant, and other than those entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of publication of the notice or within 14 days of receipt of the written notice, whichever occurs first. You cannot justifiably rely on the finality of this decision unless notice of this decision and the right of substantially affected persons to challenge this decision has been duly published or otherwise provided to all persons substantially affected by the decision. While you are not required to publish notice of this action, you may elect to do so pursuant Rule 62-110.106(10)(a).

The failure to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the discretion of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C. If you do not publish notice of this action, this waiver may not apply to persons who have not received a clear point of entry.

Extension of Time

Under Rule 62-110.106(4), F.A.C., a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov, before the deadline for filing a petition for an administrative hearing. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

Mediation

Mediation is not available in this proceeding.

Judicial Review

Once this decision becomes final, any party to this action has the right to seek judicial review pursuant to Section 120.68, F.S., by filing a Notice of Appeal pursuant to Florida Rules of Appellate Procedure 9.110 and 9.190 with the Clerk of the Department in the Office of General Counsel (Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida 32399-3000) and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice must be filed within 30 days from the date this action is filed with the Clerk of the Department.

EXECUTION AND CLERKING

Executed in Orlando, Florida.

Collier County Regional Water Treatment Plant
Howard Brogdon, Water Director
3339 East Tamiami Trail, Suite 303
Naples, FL 34112
Howard.Brogdon@colliercountyfl.gov

PWS ID: 5114069

Permit Number: 365281-131-DS/C

Issue Date: April 15, 2022

Expiration Date: April 14, 2027

County: Collier

Project Name: 98th Ave North & 99th Ave North
Water Main Replacement Project

Water Supplier: Collier County Regional WTP

This permit is issued under the provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-550, and 62-555. The above named permittee is hereby authorized to perform the work or operate the facility shown on the application and approved drawings, plans, and other documents attached hereto or on file with the Department and made a part hereof and specifically described as follows:

TO CONSTRUCT: The project will replace aging infrastructure in the Naples Park neighborhood along 98th Ave North and 99th Ave North. All sections of piping will be installed via open cut and all work will be performed within the right of way.

PROPOSED CONSTRUCTION INCLUDES:

1. Along 98th Ave North:
 - a. 5,506 LF of 8 inch C900 PVC
 - b. 15 LF of 8 inch DIP
 - c. 72 LF of 12 inch C900 PVC
2. Along 99th Ave North:
 - a. 5,505 LF of 8 inch C900 PVC
 - b. 14 LF of 8 inch DIP
 - c. 69 LF of 12 inch C900 PVC

IN ACCORDANCE WITH: Q, Grady Minor & Associates, P.A, design drawings, sheet numbers 1-28, dated March 15, 2022. The design drawings were submitted in support of the construction application. The application was dated March 15, 2022 and received the same date.

LOCATION: Project located along 98th Avenue North and 99th Avenue North in the neighborhood of Naples Park, Naples, Collier County, Florida.

Work must be conducted in accordance with the General and Specific Conditions, attached hereto.

GENERAL CONDITIONS:

The following General Conditions are referenced in Florida Administrative Code Rule 62-4.160.

1. The terms, conditions, requirements, limitations and restrictions set forth in this permit, are "permit conditions" and are binding and enforceable pursuant to Sections 403.141, 403.727, or 403.859 through 403.861, F.S. The permittee is placed on notice that the Department will review this permit periodically and may initiate enforcement action for any violation of these conditions.
2. This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviation from the approved drawings, exhibits, specifications, or conditions of this permit may constitute grounds for revocation and enforcement action by the Department.
3. As provided in subsections 403.087(6) and 403.722(5), F.S., the issuance of this permit does not convey any vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations. This permit is not a waiver of or approval of any other Department permit that may be required for other aspects of the total project which are not addressed in this permit.
4. This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title.
5. This permit does not relieve the permittee from liability for harm or injury to human health or welfare, animal, or plant life, or property caused by the construction or operation of this permitted source, or from penalties therefore; nor does it allow the permittee to cause pollution in contravention of Florida Statutes and Department rules, unless specifically authorized by an order from the Department.
6. The permittee shall properly operate and maintain the facility and systems of treatment and control (and related appurtenances) that are installed and used by the permittee to achieve compliance with the conditions of this permit, are required by Department rules. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to achieve compliance with the conditions of the permit and when required by Department rules.
7. The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, upon presentation of credentials or other documents as may be required by law and at reasonable times, access to the premises where the permitted activity is located or conducted to:
 - a. Have access to and copy any records that must be kept under conditions of the permit;
 - b. Inspect the facility, equipment, practices, or operations regulated or required under this permit; and
 - c. Sample or monitor any substances or parameters at any location reasonable necessary to assure compliance with this permit or Department rules. Reasonable time may depend on the nature of the concern being investigated.
8. If, for any reason, the permittee does not comply with or will be unable to comply with any condition or limitation specified in this permit, the permittee shall immediately provide the Department with the following information:
 - a. A description of and cause of noncompliance; and
 - b. The period of noncompliance, including dates and times; or, if not corrected, the anticipated time the noncompliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the noncompliance. The permittee shall be responsible for any and all

damages, which may result and may be subject to enforcement action by the Department for penalties or for revocation of this permit.

9. In accepting this permit, the permittee understands and agrees that all records, notes, monitoring data and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the Florida Statutes or Department rules, except where such use is prescribed by Section 403.111 and 403.73, F.S. Such evidence shall only be used to the extent it is consistent with the Florida Rules of Civil Procedure and appropriate evidentiary rules.
10. The permittee agrees to comply with changes in Department rules and Florida Statutes after a reasonable time for compliance; provided, however, the permittee does not waive any other rights granted by Florida Statutes or Department rules. A reasonable time for compliance with a new or amended surface water quality standard, other than those standards addressed in Rule 62-302.500, shall include a reasonable time to obtain or be denied a mixing zone for the new or amended standard.
11. This permit is transferable only upon Department approval in accordance with Rule 62-4.120 and 62-730.300 F.A.C., as applicable. The permittee shall be liable for any noncompliance of the permitted activity until the transfer is approved by the Department.
12. This permit or a copy thereof shall be kept at the work site of the permitted activity.
13. This permit also constitutes:
 - a. Determination of Best Available Control Technology (BACT)
 - b. Determination of Prevention of Significant Deterioration (PSD)
 - c. Certification of compliance with state Water Quality Standards (Section 401, PL 92-500)
 - d. Compliance with New Source Performance Standards
14. The permittee shall comply with the following:
 - a. Upon request, the permittee shall furnish all records and plans required under Department rules. During enforcement actions, the retention period for all records will be extended automatically unless otherwise stipulated by the Department.
 - b. The permittee shall hold at the facility or other location designated by this permit records of all monitoring information (including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation) required by the permit, copies of all reports required by this permit, and records of all data used to complete the application for this permit. These materials shall be retained at least three years from the date of the sample, measurement, report, or application unless otherwise specified by Department rule.
 - c. Records of monitoring information shall include:
 1. the date, exact place, and time of sampling or measurements;
 2. the person responsible for performing the sampling or measurements;
 3. the dates analyses were performed;
 4. the person responsible for performing the analyses;
 5. the analytical techniques or methods used;
 6. the results of such analyses.
15. When requested by the Department, the permittee shall within a reasonable time furnish any information required by law, which is needed to determine compliance with the permit. If the permittee becomes

aware the relevant facts were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be corrected promptly.

SPECIFIC CONDITIONS:

1. The Permittee shall retain service a Florida-licensed professional engineer in accordance with subsection 62-555.530(3), F.A.C., to take responsible charge of inspecting construction of the project for the purpose of determining in general if the construction proceeds in compliance with the permit, including the approved preliminary design report or drawings and specifications for the project.
2. Chemicals that are contained in coatings that are applied to a surface in contact with drinking water, or are otherwise on equipment surfaces that come into contact with the water, and additives and chemicals used to treat water shall conform to American National Standards Institute (ANSI)/NSF International Standard 60-1988. Water system components whose surfaces come into contact with drinking water shall conform to ANSI/NSF Standard 61-1991. The authorized representative of the public water system shall certify in writing that each item conforms to the appropriate standard prior to release for operation. [Rules 62-555.320(3) (a), 62-555.320(3)(b) and 62-555.320(3)(d), F.A.C.]
3. When any existing asbestos cement (AC) pipes are replaced under this permit, the permittee shall do so in accordance with the applicable rules of Federal Asbestos Regulation and Florida DEP requirements. For specific requirements applicable to AC pipes, the permittee should contact the Department prior to commencing any such activities at (239) 344-5600. Please be aware that a notification is required to be submitted to the Department for a regulated project.
4. The installation or repair of any public water system, or any plumbing in residential or nonresidential facility providing water for human consumption, which is connected to a public water system, shall be lead free. [Rule 62-555.322(1), F.A.C.]
5. Permittee shall maintain vertical clearance and horizontal separation between water mains and sanitary sewers, storm sewers, etc. unless approved otherwise by the Department, as provided in Rule 62-555.314, F.A.C., and Section 8.6 of *Recommended Standards for Water Works*, a manual adopted by reference in Rule 62-555.330(3), F.A.C.
6. The permittee or suppliers of water shall telephone the State Warning Point (SWP), at 1-800-320-0519 immediately (i.e. within two hours) after discovery of any actual or suspected sabotage or security breach, or any suspicious incident, involving a public water system in accordance with the F.A.C. Rule 62-555.350(10).
7. The permittee must instruct the engineer of record to request system clearance from the Department within sixty (60) days of completion of construction, testing and disinfecting the system. Bacteriological test results shall be considered unacceptable if the test were completed more than 60 days before the Department received the results. [Rule 62-555.340(2) (c) F.A.C.]

Permitted construction or alteration of a public water system may not be placed into service until a letter of clearance has been issued by this Department. [Rule 62-555.345, F.A.C.]

8. Prior to placing the new station in service, the Permittee shall have complete record drawings produced for the project in accordance with subsection 62-555.530(4), F.A.C.
9. The Permittee shall submit a certification of construction completion to the Department and obtain approval or clearance, from the Department per Rule 62-555.345, F.A.C., before placing any public water system components constructed or altered under this permit in operation for any purpose other

than disinfection, testing for leaks, or testing equipment operation. This does not prohibit the Permittee from cutting into existing water mains, and returning the water mains to operation in accordance with subsection 62-555.340(5), F.A.C., without the Department's approval.

10. Prior to placing this project into service, Permittee shall submit, at a minimum, all of the following to the Department for evaluation and approval for operation, as provided in Rules 62-555.340 and 62-555.345, F.A.C.:
 - a. The Certification of Construction Completion and Request for Clearance to Place Permitted PWS Components into Operation {DEP Form 62-555.900(9)}
 - b. Certified record drawings, if there are any changes noted for the permitted project.
 - c. Copy of a satisfactory pressure test of the process piping performed in accordance with AWWA Standards. [Rule 62-555.320(21) (a) (1), F.A.C.]
 - d. Two consecutive days of satisfactory distribution bacteriological analytical results.

In order to facilitate the issuance of a letter of clearance, the Department requests that all of the above information be submitted as one package.

--

Your Self-Certification is based solely on the information you provided under this process, and applies only to the statutes and rules in effect when your certification was completed. The certification is effective only for the specific project proposed, and only if the project is constructed, operated, and maintained in conformance with all the terms, conditions, and limitations stated in the Self-Certification Process. In addition, any substantial modifications in your plans should be submitted to the Department for review, as changes may result in a permit being required.

Completion of the Self-Certification constitutes your authorization for Department personnel to enter the property for purposes of inspecting for compliance.

This Self-Certification Process does not relieve you from the responsibility of obtaining other permits or authorizations from other agencies (federal, state, Water Management District, county, or local) that may be required for the project. Failure to obtain all applicable authorizations prior to construction of the project may result in enforcement.

If you have any questions concerning this process, please contact South District by e-mail at SD_newapps@dep.state.fl.us.

Sincerely,
Florida Department of Environmental Protection

Naples, FL 34112

**Subject: Naples Park Infrastructure Improvements
Master Dewatering Permit 11-03812-W
Project: 98th Avenue North, 99 Avenue North, 105th Avenue North,
106th Avenue North
Application No.: 220408-4
Collier County**

The applicant requests the addition of dewatering activities associated with underground utility installation to the existing master dewatering permit for the Naples Park Infrastructure Improvements (11-03812-W) in accordance with Special Permit Condition # 19. The Project encompasses the areas along 98th Avenue North, 99th Avenue North, 105th Avenue North, and 106th Avenue North, between Vanderbilt Drive and US-41 in Collier County. The dewatering will follow the strategy outlined in the master dewatering permit. The maximum daily pumpage is estimated to be approximately 2 million gallons. The total pumpage for the Project is expected to be approximately 440 million gallons, and the dewatering will be completed in approximately six to eight months.

There is one potential source of contamination within the vicinity of the Project. The One Hour Dry Cleaners facility (Florida Department of Environmental Protection Facility ID: ERIC_4288) is located southwest of the intersection of 99th Avenue North and US-41. To prevent the potential migration of groundwater pollution, no dewatering will occur within 500 feet of the One Hour Dry Cleaners facility. Additionally, dewatering will be localized with the use of trench boxes and temporary as the dewatering progresses along 98th Avenue North and 99th Avenue North. The Permittee shall follow the contamination monitoring plan outlined in the turbidity monitoring plan.

The dewatering effluent will pass through turbidity controls before discharging off-site. Upon meeting the requirements outlined in the turbidity monitoring plan, the dewatering effluent will be discharged to the Vanderbilt Channel canal system or the stormwater management system along 8th Street North.

The dewatering description and turbidity monitoring plan are included as Attachment A. Dewatering plans Attachments B. An updated Requirement by Permit Condition Report is presented as Revised Exhibit 5.

Tom Chmelik
98th Avenue North, 99 Avenue North, 105th Avenue North, 106th Avenue North, Application
No. 220408-4
April 20, 2022
Page 2

At least 72 hours prior to initial dewatering, the Permittee shall notify District Staff via email at wucompliance@sfwmd.gov, that dewatering is about to commence. A copy of the permit, its permit conditions, and dewatering plan is required to be kept on site at all times during dewatering operations by the lead contractor or site manager. The Permittee is advised that this permit does not relieve any person from the requirement to obtain all necessary federal, state, local and special district authorizations.

After review of the information submitted for the above referenced project, it appears that the notification requirement of the Master Dewatering Permit has been met and the South Florida Water Management District has no objections to the dewatering operations. You may proceed with the work indicated, with the understanding that the Collier County Board of County Commissioners is responsible for assuring that the project operates within the requirements listed in the Master Dewatering Permit (11-03812-W) and for mitigating any adverse impacts that might result from the dewatering operation.

Should you have any questions regarding this application or this letter, please contact Sean Robertson at (239) 338-2929 extension 7719 or sroberts@sfwmd.gov.

Sincerely,

Brad D. Cook, P.G.
Section Leader
South Florida Water Management District

NOTICE OF RIGHTS

As required by Chapter 120, Florida Statutes, the following provides notice of the opportunities which may be available for administrative hearing pursuant to Sections 120.569 and 120.57, Florida Statutes, or judicial review pursuant to Section 120.68, Florida Statutes, when the substantial interests of a party are determined by an agency. Please note that this Notice of Rights is not intended to provide legal advice. Some of the legal proceedings detailed below may not be applicable or appropriate for your situation. You may wish to consult an attorney regarding your legal rights.

RIGHT TO REQUEST ADMINISTRATIVE HEARING

A person whose substantial interests are or may be affected by the South Florida Water Management District's (District) action has the right to request an administrative hearing on that action pursuant to Sections 120.569 and 120.57, Florida Statutes. Persons seeking a hearing on a District decision which affects or may affect their substantial interests shall file a petition for hearing in accordance with the filing instructions set forth herein within 21 days of receipt of written notice of the decision unless one of the following shorter time periods apply: (1) within 14 days of the notice of consolidated intent to grant or deny concurrently reviewed applications for environmental resource permits and use of sovereign submerged lands pursuant to Section 373.427, Florida Statutes; or (2) within 14 days of service of an Administrative Order pursuant to Section 373.119(1), Florida Statutes. "Receipt of written notice of agency decision" means receipt of written notice through mail, electronic mail, posting, or publication that the District has taken or intends to take final agency action. Any person who receives written notice of a District decision and fails to file a written request for hearing within the timeframe described above waives the right to request a hearing on that decision.

If the District takes final agency action that materially differs from the noticed intended agency decision, persons who may be substantially affected shall, unless otherwise provided by law, have an additional point of entry pursuant to Rule 28-106.111, Florida Administrative Code.

Any person to whom an emergency order is directed pursuant to Section 373.119(2), Florida Statutes, shall comply therewith immediately, but on petition to the board shall be afforded a hearing as soon as possible.

A person may file a request for an extension of time for filing a petition. The District may grant the request for good cause. Requests for extension of time must be filed with the District prior to the deadline for filing a petition for hearing. Such requests for extension shall contain a certificate that the moving party has consulted with all other parties concerning the extension and whether the District and any other parties agree to or oppose the extension. A timely request for an extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

FILING INSTRUCTIONS

A petition for administrative hearing must be filed with the Office of the District Clerk. Filings with the Office of the District Clerk may be made by mail, hand-delivery, or e-mail. Filings by facsimile will not be accepted. A petition for administrative hearing or other document is deemed filed upon receipt during normal business hours by the Office of the District Clerk at the District's headquarters in West Palm Beach, Florida. The District's normal business hours are 8:00 a.m. – 5:00 p.m., excluding weekends and District holidays. Any document received by the Office of the District Clerk after 5:00 p.m. shall be deemed filed as of 8:00 a.m. on the next regular business day. Additional filing instructions are as follows:

- Filings by mail must be addressed to the Office of the District Clerk, 3301 Gun Club Road, West Palm Beach, Florida 33406.

- Filings by hand-delivery must be delivered to the Office of the District Clerk. Delivery of a petition to the District's security desk does not constitute filing. It will be necessary to request that the District's security officer contact the Office of the District Clerk. An employee of the District's Clerk's office will receive and process the petition.
- Filings by e-mail must be transmitted to the Office of the District Clerk at clerk@sfwmd.gov. The filing date for a document transmitted by electronic mail shall be the date the Office of the District Clerk receives the complete document.

INITIATION OF AN ADMINISTRATIVE HEARING

Pursuant to Sections 120.54(5)(b)4. and 120.569(2)(c), Florida Statutes, and Rules 28-106.201 and 28-106.301, Florida Administrative Code, initiation of an administrative hearing shall be made by written petition to the District in legible form and on 8 1/2 by 11 inch white paper. All petitions shall contain:

1. Identification of the action being contested, including the permit number, application number, District file number or any other District identification number, if known.
2. The name, address, any email address, any facsimile number, and telephone number of the petitioner, petitioner's attorney or qualified representative, if any.
3. An explanation of how the petitioner's substantial interests will be affected by the agency determination.
4. A statement of when and how the petitioner received notice of the District's decision.
5. A statement of all disputed issues of material fact. If there are none, the petition must so indicate.
6. A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the District's proposed action.
7. A statement of the specific rules or statutes the petitioner contends require reversal or modification of the District's proposed action.
8. If disputed issues of material fact exist, the statement must also include an explanation of how the alleged facts relate to the specific rules or statutes.
9. A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the District to take with respect to the District's proposed action.

MEDIATION

The procedures for pursuing mediation are set forth in Section 120.573, Florida Statutes, and Rules 28-106.111 and 28-106.401–405, Florida Administrative Code. The District is not proposing mediation for this agency action under Section 120.573, Florida Statutes, at this time.

RIGHT TO SEEK JUDICIAL REVIEW

Pursuant to Section 120.68, Florida Statutes, and in accordance with Florida Rule of Appellate Procedure 9.110, a party who is adversely affected by final District action may seek judicial review of the District's final decision by filing a notice of appeal with the Office of the District Clerk in accordance with the filing instructions set forth herein within 30 days of rendition of the order to be reviewed, and by filing a copy of the notice with the appropriate district court of appeals via the Florida Courts E-Filing Portal.

SPECIAL PERMIT CONDITIONS

1. This permit is issued to:
COLLIER COUNTY BOARD OF COUNTY COMMISSIONERS
3299 TAMIAMI TRAIL EAST, SUITE 303
NAPLES, FL - 34112

2. This permit shall expire on September 23, 2026.

3. Use classification is:

Dewatering

4. Source classification is:

Surface Water from:
Water Table aquifer

5. Pursuant to Subsection 2.3.2.B.2 of the Applicant's Handbook for Water Use Permit Applications within the South Florida Water Management District, neither maximum monthly nor annual allocation volumes are specified.

6. Withdrawal facilities:

Surface Water - Proposed:

1 - 4" x 10 HP X 250 GPM Centrifugal Pump
1 - 4" x 20 HP X 900 GPM Hydraulic Pump
1 - 6" x 40 HP X 1500 GPM Hydraulic Pump
1 - 12" x 160 HP X 7200 GPM Hydraulic Pump
1 - 8" x 55 HP X 2500 GPM Hydraulic Pump
1 - 6" x 40 HP X 1500 GPM Centrifugal Pump

7. The Permittee shall submit all data as required by the implementation schedule for each of the permit conditions to: SFWMD at www.sfwmd.gov/ePermitting, or Regulatory Support, 3301 Gun Club Road, West Palm Beach, FL 33406.

8. The Permittee must submit the appropriate application form incorporated by reference in Rule 40E-2.101, F.A.C., to the District prior to the permit expiration date in order to continue the use of water.

9. The excavation shall be constructed using sound engineering practices. If the excavation or dewatering activities endanger the properties of adjacent owners (through erosion, side wall collapse, flooding, etc.), the Permittee shall cease operations until a method to prevent such occurrences is found and instituted. The Permittee shall be responsible for finding and instituting methods to stop such occurrences.
10. The Permittee shall immediately cease dewatering when continued dewatering would create a condition hazardous to the health, safety, and general welfare of the people of the District.
11. The Permittee shall be responsible for clearing shoaling, if the Permittee's dewatering operation creates shoaling in adjacent water bodies.
12. The Permittee shall conduct dewatering activities in adherence to the following operating plan:

Dewatering is necessary to facilitate the replacement of underground utilities including potable water mains, sanitary sewer gravity lines, force mains, lift stations, and stormwater drainage improvements within in the Naples Park community. The Project will utilize six proposed surface water pumps. There is insufficient area for on-site storage of dewatering effluent and off-site discharge to tidal waters associated with the Vanderbilt Channel will be necessary. Off-site discharge may also be needed into the 8th Street North stormwater management sytem associated with the Collier County stormwater discharge system. For more details refer to Exhibits 7 through 9 of Master Dewatering Permit 11-03812-W under application 160725-5.

13. Off-site discharge may be made via the facilities and conditions that follow:

This permit will allow off-site discharge to the canal system associated with Vanderbilt Channel via the currently permitted Collier County stormwater discharge system. Off-site discharge may be needed into the 8th Street North stormwater management sytem associated with the Collier County stormwater discharge system. Dewatering will utilize well points when possible with sumps only used in isolated areas in an effort to minimize the turbidity of the dewatering effluent as described in Exhibit 7 and depicted in Exhibit 8 of the Master Dewatering Permit 11-03812-W under application 160725-5. All off-site dewatering effluent will be monitored for turbidity and potential petroleum contamination as outlined in Exhibit 9 (under application 160725-5). The Permittee shall be adhere to all conditions

outlined in the associated FDEP NPDES Permit No. FLG071640-001 provided in Exhibit 10 of the Master Dewatering Permit 11-03812-W under application 160725-5.

14. Turbidity measurements of the dewatering water shall be made twice daily at the point of discharge and a background location (upstream) in the receiving water body. If turbidity levels in the dewatering water exceed 29 NTU above background conditions in the receiving water body, or 0 NTU above background for discharge to Outstanding Florida Waters, the Permittee is required to correct the situation and cease dewatering operations until monitoring demonstrates turbidity standards are met. All turbidity data shall be retained on-site for inspection by District Staff.

The turbidity monitoring plan is provided in Exhibit 9 (under application 160725-5).

15. The Permittee shall not lower the water table below the following depths:
 - 19 feet National Geodetic Vertical Datum (NGVD).
16. The Permittee shall construct the proposed recharge trenches prior to dewatering and maintain water levels during active dewatering operations within one foot below land surface. Obstructions and sediments within the recharge trenches shall be removed to maintain the effectiveness of the recharge trenches.
17. Within 30 days of completion of the dewatering operation, all dewatering facilities (such as impoundments, conveyances, and recharge trenches) shall be filled and regraded to ground elevation or to otherwise comply with the Environmental Resource Permit.
18. A copy of the permit, its conditions, and dewatering plan is required to be kept on site at all times during dewatering operations by the lead contractor or site manager.
19. At least two weeks prior to commencing dewatering, the Permittee shall provide site specific dewatering plans for each proposed dewatering activity to the District for review and approval. Permittee shall not initiate dewatering prior to receiving written notification from District staff, that the proposed dewatering activity is consistent with the approved master permit.

Site specific plans shall include assessments to provide assurances that dewatering will not cause adverse impacts to the water resource availability, existing legal users, existing off-site land uses, migration of saline water, wetland environments or movement of contaminants.

20. The Permittee shall implement the following water quality monitoring program:

The specific monitoring required for each set of site-specific plans will be determined based on the potential for movement of contaminants or saline water intrusion. The Permittee shall provide to the District a monitoring and remedial action plan, as needed, that will use approved methods and equipment to treat the dewatering effluent to the appropriate state standards prior to discharge. If off-site discharge of the dewatering effluent is proposed, the Permittee shall include a turbidity monitoring plan with the site-specific plans.

21. At least 72 hours prior to initial dewatering, the Permittee shall contact the District to allow for a site visit to verify:

a. The location and design of the recharge trenches and on-site retention areas where dewatering water will be retained;

b. The location of monitoring facilities; and,

c. Other site-specific issues related to the protection of the resource or other existing legal users.

Failure of the Permittee, or the Permittee's representative, to notify the District before dewatering commences will result in enforcement action. If necessary, the District shall conduct a site visit.

Notification of commencement of dewatering can be made by contacting: wucompliance@sfwmd.gov

Alternatively, please contact:
Scott Korf, Water Use Compliance Analyst
(239) 338-2929 x7738
skorf@sfwmd.gov

22. If required after review of site-specific plans, the Permittee shall record monthly withdrawals for each dewatering pump and recorded information shall be kept on-site for review by District staff.

STANDARD PERMIT CONDITIONS

1. All water uses authorized by this permit shall be implemented as conditioned by this permit, including any documents incorporated by reference in a permit condition. The District may revoke this permit, in whole or in part, or take enforcement action, pursuant to Section 373.136 or 373.243, F.S., unless a permit modification has been obtained to address the noncompliance.

The Permittee shall immediately notify the District in writing of any previously submitted material information that is later discovered to be inaccurate.

2. The Permittee is advised that this permit does not relieve any person from the requirement to obtain all necessary federal, state, local and special district authorizations.
3. The Permittee shall notify the District in writing within 30 days of any sale, transfer, or conveyance of ownership or any other loss of permitted legal control of the Project and/or related facilities from which the permitted consumptive use is made. Where Permittee's control of the land subject to the permit was demonstrated through a lease, the Permittee must either submit a new or modified lease showing that it continues to have legal control or documentation showing a transfer in control of the permitted system/project to the new landowner or new lessee. All transfers of ownership are subject to the requirements of Rule 40E-1.6107, F.A.C. Alternatively, the Permittee may surrender the consumptive use permit to the District, thereby relinquishing the right to conduct any activities under the permit.
4. Nothing in this permit should be construed to limit the authority of the District to declare a water shortage and issue orders pursuant to Chapter 373, F.S. In the event of a declared water shortage, the Permittee must adhere to the water shortage restrictions, as specified by the District. The Permittee is advised that during a water shortage, reports shall be submitted as required by District rule or order. The Permittee is advised that during a water shortage, pumpage, water levels, and water quality data shall be collected and submitted as required by District orders issued pursuant to Chapter 40E-21, F.A.C.
5. This permit does not convey to the Permittee any property rights or privileges other than those specified herein, nor relieve the permittee from complying with any applicable local government, state, or federal law, rule, or ordinance.
6. With advance notice to the Permittee, District staff with proper identification shall have permission to enter, inspect, observe, collect samples, and take measurements of permitted facilities to determine compliance with the permit conditions and permitted plans and specifications. The Permittee shall either accompany District staff onto the

property or make provision for access onto the property.

7. A. The Permittee may seek modification of any term of an unexpired permit. The Permittee is advised that Section 373.239, F.S., and Rule 40E-2.331, F.A.C., are applicable to permit modifications.

B. The Permittee shall notify the District in writing 30 days prior to any changes to the project that could potentially alter the reasonable demand reflected in the permitted allocation. Such changes include, but are not limited to, change in irrigated acreage, crop type, irrigation system, large users agreements, or water treatment method. Permittee will be required to apply for a modification of the permit for any changes in permitted allocation.

8. If any condition of the permit is violated, the permit shall be subject to review and modification, enforcement action, or revocation pursuant to Chapter 373, F.S.

9. The Permittee shall mitigate interference with existing legal uses that was caused in whole or in part by the Permittee's withdrawals, consistent with the approved mitigation plan. As necessary to offset the interference, mitigation will include pumpage reduction, replacement of the impacted individual's equipment, relocation of wells, change in withdrawal source, or other means.

Interference to an existing legal use is defined as an impact that occurs under hydrologic conditions equal to or less severe than a 1-in-10 year drought event that results in the:

A. Inability to withdraw water consistent with provisions of the permit, such as when remedial structural or operational actions not materially authorized by existing permits must be taken to address the interference; or

B. Change in the quality of water pursuant to primary State Drinking Water Standards to the extent that the water can no longer be used for its authorized purpose, or such change is imminent.

10. The Permittee shall mitigate harm to the natural resources caused by the Permittee's withdrawals, as determined through reference to the conditions for permit issuance. When harm occurs, or is imminent, the District will require the Permittee to modify withdrawal rates or mitigate the harm. Harm, as determined through reference to the conditions for permit issuance includes:

A. Reduction in ground or surface water levels that results in harmful lateral movement

of the fresh water/salt water interface,

B. Reduction in water levels that harm the hydroperiod of wetlands,

C. Significant reduction in water levels or hydroperiod in a naturally occurring water body such as a lake or pond,

D. Harmful movement of contaminants in violation of state water quality standards, or

E. Harm to the natural system including damage to habitat for rare or endangered species.

11. The Permittee shall mitigate harm to existing off-site land uses caused by the Permittee's withdrawals, as determined through reference to the conditions for permit issuance. When harm occurs, or is imminent, the District will require the Permittee to modify withdrawal rates or mitigate the harm. Harm as determined through reference to the conditions for permit issuance, includes:

A. Significant reduction in water levels on the property to the extent that the designed function of the water body and related surface water management improvements are damaged, not including aesthetic values. The designed function of a water body is identified in the original permit or other governmental authorization issued for the construction of the water body. In cases where a permit was not required, the designed function shall be determined based on the purpose for the original construction of the water body (e.g. fill for construction, mining, drainage canal, etc.)

B. Damage to agriculture, including damage resulting from reduction in soil moisture resulting from consumptive use; or,

C. Land collapse or subsidence caused by reduction in water levels associated with consumptive use.

**RE: Site Specific Dewatering Plans of 98th/99th & 105th/106th Avenue North at Naples Park
Naples Park Infrastructure Improvements Master Dewatering Permit, Naples, Collier County, Florida
SFWMD WUP 11-03812-W**

Dear Mr. Cook:

Water Science Associates, Inc. is pleased to provide site specific dewatering plans for the Naples Park Infrastructure Improvements project under Master Dewatering Permit No. 11-03812-W, in accordance with Special Permit Conditions No. 19 and 20. The purpose of the site specific dewatering plans is to provide details of utility installations for the project area including improvements east of Vanderbilt Drive and west of US 41 along 98th / 99th Avenue North and 105th /106th Avenue North. These streets are located within the footprint of the Master Dewatering Permit. Refer to **Figure 1** for a map showing the regional location of the site and refer to **Figure 2** for the project area map of the referenced phases of infrastructure improvements.

In accordance with Special Permit Condition No. 19, site specific dewatering plans for the proposed dewatering activity for the 98th / 99th and 105th / 106th Avenue North utility installations at the Naples Park Infrastructure Improvements project are provided herein. Information provided in support of this letter modification is listed below. Details regarding off-site discharge, dewatering plan, and turbidity monitoring are provided in the following subsections.

- Figure 1 Regional Location Map
- Figure 2 Aerial Map Showing Project Footprint and General Effluent/Stormwater Flow Direction
- Figures 3 through 6 Pertinent Features of the 98th and 99th Avenue Phase Project.
- Figures 7 through 10 Pertinent Features of the 105th and 106th Avenue Phase Project.
- Figure 11 Conceptual Dewatering Options for Typical Utility Lines at Vanderbilt Channel Discharge
- Figure 12 Conceptual Dewatering Options for Typical Utility Lines at 8th Street Discharge
- Figure 13 98th, 99th, 105th and 106th Avenue Phase Project Potential Dewatering Discharge Locations.

Dewatering Plan – Dewatering for the 98th / 99th and 105th / 106th Avenue North project areas will utilize the existing stormwater swale system to maintain effluent discharge near the area of dewatering to the maximum extent possible. Where necessary, dewatering effluent may be directed off-site via the existing stormwater discharge system to outfall structures associated with the Vanderbilt Channel and the 8th Street North stormwater management system which ultimately enters the stormwater management lakes located on the north side of 111th Avenue North at 108th Street North. .

The 98th/99th and 105th/106th Avenue North project area covers three stormwater drainage basins (Naples Park West Basin, Naples Park North Basin and Naples Park South Basin). Stormwater drainage for these basins is typically directed to the outfall locations associated with the Vanderbilt Channel for portions west of 7th Street North and to the 8th Street North stormwater system for areas east of 7th Street North. Refer to **Figure 2** for a map showing general effluent and stormwater flow direction. Dewatering for the current phase(s) of the project will primarily consist of well points to aid in reducing potential turbidity, however, sumps may be used in selected areas with sufficient storage for

turbidity treatment prior to off-site discharge. Discharge water will be directed to swales or frac tanks if necessary to reduce turbidity prior to directing dewatering effluent to the nearest existing permitted stormwater line that discharges into tidal waters associated with the Vanderbilt Channel or the stormwater management system of the 8th Street North discharge line. Floating turbidity curtains will be installed surrounding the existing stormwater discharge lines if needed. Refer to **Figures 3 through 10** for maps showing pertinent features of the 108th and 109th project area, including the locations of anticipated discharge lines.

The maximum dewatering elevation for the 98th/99th and 105th/106th project areas is -7 feet NGVD (or about 14 feet below land surface), associated with sanitary sewer installations along Vanderbilt Drive within the approved Master Dewatering Permit of -19 feet NGVD. The deepest stormwater structure is about -2 feet NGVD. The majority of dewatering for the sanitary sewer system will be to elevations between 0 and +9 feet NGVD and for stormwater lines and structures above +2 feet NGVD. Excavation boxes and/or sheet piling may be used for deeper excavations, which aid in maintaining slope stability and can result in reduced dewatering rates.

Procedurally, dewatering effluent will be tested at discharge and directed from the well point system to swales and/or frac tanks if turbidity treatment is necessary or alternatively, directed to the nearest off-site discharge line if turbidity treatment is not necessary (refer to Monitoring Plan below). Floating turbidity curtains may also be installed at the existing discharge point if needed. Refer to **Figures 11 and 12** for examples of conceptual dewatering options for utility installations at the 98th/99th and 105th/106th Avenue North project and refer to **Table 1** below for anticipated dewatering duration and volumes.

Table 1. 98th/99th and 105th/106th Avenue North - Estimated Dewatering Quantities

Phase	Operation Period (GPD)	*Max Daily Pumpage (GPD)	Max Pumpage Duration (Days)	*Average Daily Pumpage (GPD)	Average Pumpage Duration (Days)	Total Pumpage (Million Gallons)
Shallow Utilities	200,000	800,000	150	200,000	600	240
Deep Utilities	500,000	2,000,000	50	500,000	200	200
Total						440

*Average Daily and Maximum Daily Pumpage rates are based on volume calculations estimated for Master Dewatering Permit Application No. 160725-5. These calculations are used as general estimates of pumping rates that may be required onsite. The calculations rely on assumed conditions such as hydraulic conductivity, aquifer heterogeneity, constant hydraulic gradients, etc. The calculations are useful to aid in determining anticipated pumping needs, but do not represent exact pumping volumes or duration that may be necessary.

Potential Contamination – Review of the Florida Department of Environmental Protection (FDEP) Map Direct: Contamination Locator website and database indicates an identified site with potential contamination for chlorinated hydrocarbons associated with the One Hour Dry Cleaners facility (FDEP Facility ID: ERIC_4288). The facility is located southwest of the intersection of 99th Avenue North and US 41 and is currently listed as “On Hold” cleanup status for contamination of soils reported on June 26, 1997. The facility retains eligibility for state-administered cleanup under the Dry Cleaning Solvent Cleanup Program and pending rehabilitation. To aid in the prevention of the migration of potential groundwater contaminants, no dewatering is proposed within 500 feet of the One Hour Dry Cleaners facility. Refer to **Figure 6** for a map showing the area of limited dewatering for the 98th/99th Avenue project area. The use of trench boxes to maintain slope stability during utility installations near the facility will have an additional benefit of restricting groundwater flow. This results in requiring less pumpage to depress groundwater elevations and limits potential drawdown outside of the trench box meaning temporary drawdown in the Water Table Aquifer will be localized

and is not expected to result in significant effects of the potentiometric surface offsite which could induce the movement of contaminants.

Turbidity Monitoring - Special Permit Condition No. 20 states the Permittee shall implement a water quality monitoring program such that the monitoring requirements will be determined and provided for each dewatering site along with site specific plans in accordance with Special Permit Condition 19. To ensure turbidity does not exceed 29 NTU's above background in the channel and the off-site stormwater management lake(s), the Applicant will employ the site specific Turbidity Monitoring Plan detailed below for dewatering at 98th/99th and 105th/106th Avenue North project areas.

Dewatering effluent will be monitored for turbidity. Water samples will be collected from the dewatering discharge system prior to entering the Vanderbilt Channel and/or the 8th Street North stormwater management system for field screening for NTU's using a handheld turbidity meter. The background sample locations will be selected based on legal access to the channel for sampling and the current off-site discharge line used. The intent is to collect background samples upstream from the nearest off-site discharge point (but at least 100 feet from the discharge point). The background sample for the 8th Street North will be collected from the Collier County stormwater management lake, located on the north side of 111th Avenue North and 8th Street North. Water samples will be collected from the dewatering discharge twice per day and compared to the background sample collected prior to dewatering. Refer to **Figure 13** for the locations of potential discharge lines and potential background sample locations.

Floating turbidity barriers will be installed around each off-site discharge line when in use. Additionally, the contractor may need to install piping to discharge dewatering effluent directly into the channel under some conditions. Should direct discharge become necessary, the contractor will extend the pipe into the canal and direct discharge through a 90° elbow so that discharge is directed upward. This design feature will minimize potential scouring of sediments at the bed of the channel. Additional, turbidity control measures may include using existing swales for settling basins, floc logs, baffles, frac tanks, floating turbidity curtains, etc. These systems will be used as needed to ensure that turbidity does not exceed 29 NTU's above background in the canal system.

All background and turbidity sampling results will be kept in a log book at the project site for review by authorized SFWMD personnel. The information recorded in the log book will include:

- The date and time(s) of sample collection and analysis
- A description of the sampling and testing methods
- A map or description of the sampling locations(s) and depths
- The results of the turbidity measurements (dewatering effluent and background)
- Any relevant observations or environmental factors that could affect the results
- The signature of the authorized individual performing the turbidity monitoring

If turbidity measurements of dewatering effluent exceed 29 NTUs above the background value, off-site discharge of dewatering effluent will cease, and additional turbidity control measures will be installed, which may include but not be limited to: applying floc logs, additional baffles, frac tanks, and/or extended sedimentation basin areas, until turbidity standards are met. Monitoring will cease when off-site discharge stops.

Should a sheen or petroleum odors be detected during construction activities, dewatering of the immediate area will be temporarily suspended until dewatering effluent samples can be collected to confirm the absence or presence of petroleum constituents. Dewatering effluent will be sampled for FL-PRO (petroleum range hydrocarbons) and BTEX (benzene, toluene, ethyl-benzene, and xylenes). Sample results will be compared to applicable target levels in accordance with Chapter 62-777, F.A.C. If results are below applicable target levels, then dewatering effluent may be discharged off-site. Should results indicate constituents above target levels, then dewatering effluent will be directed

through mobile treatment units such as mobile air stripper, and/or activated carbon vessels and sampled again prior to off-site discharge. Contaminated dewatering effluent may also be directed to mobile tankers for off-site remediation. We appreciate your attention to this matter. Should you have any questions or require additional information, please do not hesitate to contact Michael Jessich or Andrew McThenia.

Sincerely,

A handwritten signature in black ink, appearing to read "MJ", written over a light blue horizontal line.

Subject: Exemption for 98th Ave N And 99th Ave N Utility Renewal Project
Application No. 220308-33479
Exemption No. 11-106871-P
Collier County

Dear Mr. Girgis:

The South Florida Water Management District (District) reviewed the information submitted for the proposed utility and stormwater improvements and has determined that the proposed project is exempt from the requirement to obtain an Environmental Resource Permit, pursuant to rule 62-330.051(15) Florida Administrative Code.

The proposed improvements include the replacement of stormwater drainage infrastructure. The design includes planning for a future 5-foot-wide sidewalk. The proposed project is anticipated to maintain the existing swale capacity and provide additional water quality treatment by construction of weirs to hold back stormwater prior to discharge, in accordance with Exhibit Nos. 2.0A, 2.0B, and 2.0C.

Activities that qualify for this exemption must be conducted and operated using appropriate best management practices and in a manner which does not cause or contribute to a water quality violation, pursuant to Chapters 62-302 or 62-4, Florida Administrative Code.

This letter does not relieve you from the responsibility of obtaining other permits (federal, state or local) which may be required for the project.

The determination that this project qualifies as an exempt activity may be revoked if the installation is substantially modified, if the basis of the exemption is determined to be materially incorrect, or if the installation results in a violation of state water quality standards. Any changes made in the construction plans or location of the project may necessitate a permit from the District. Therefore, you are advised to contact the District before beginning any work in wetlands or other surface waters which is not specifically described in the submittal.

The notice of determination that the project qualifies as an exempt activity constitutes final agency action by the District unless a petition for administrative hearing is filed. Upon timely filing of a petition, this Notice will not be effective until further Order of the District. If you have any questions concerning this matter, please contact Kimberly McNeely, at (239) 338-2929 x7739 or , and Alexis Schauer, Engineering Specialist 4, at 561-682-6605 or aschauer@sfwmd.gov.

Collier County Water-sewer District
98th Ave N And 99th Ave N Utility Renewal Project, Application No. 220308-33479
April 7, 2022

[Exhibit No. 2.0C SWM Plans Part 3](#)

NOTICE OF RIGHTS

As required by Chapter 120, Florida Statutes, the following provides notice of the opportunities which may be available for administrative hearing pursuant to Sections 120.569 and 120.57, Florida Statutes, or judicial review pursuant to Section 120.68, Florida Statutes, when the substantial interests of a party are determined by an agency. Please note that this Notice of Rights is not intended to provide legal advice. Some of the legal proceedings detailed below may not be applicable or appropriate for your situation. You may wish to consult an attorney regarding your legal rights.

RIGHT TO REQUEST ADMINISTRATIVE HEARING

A person whose substantial interests are or may be affected by the South Florida Water Management District's (District) action has the right to request an administrative hearing on that action pursuant to Sections 120.569 and 120.57, Florida Statutes. Persons seeking a hearing on a District decision which affects or may affect their substantial interests shall file a petition for hearing in accordance with the filing instructions set forth herein within 21 days of receipt of written notice of the decision unless one of the following shorter time periods apply: (1) within 14 days of the notice of consolidated intent to grant or deny concurrently reviewed applications for environmental resource permits and use of sovereign submerged lands pursuant to Section 373.427, Florida Statutes; or (2) within 14 days of service of an Administrative Order pursuant to Section 373.119(1), Florida Statutes. "Receipt of written notice of agency decision" means receipt of written notice through mail, electronic mail, posting, or publication that the District has taken or intends to take final agency action. Any person who receives written notice of a District decision and fails to file a written request for hearing within the timeframe described above waives the right to request a hearing on that decision.

If the District takes final agency action that materially differs from the noticed intended agency decision, persons who may be substantially affected shall, unless otherwise provided by law, have an additional point of entry pursuant to Rule 28-106.111, Florida Administrative Code.

Any person to whom an emergency order is directed pursuant to Section 373.119(2), Florida Statutes, shall comply therewith immediately, but on petition to the board shall be afforded a hearing as soon as possible.

A person may file a request for an extension of time for filing a petition. The District may grant the request for good cause. Requests for extension of time must be filed with the District prior to the deadline for filing a petition for hearing. Such requests for extension shall contain a certificate that the moving party has consulted with all other parties concerning the extension and whether the District and any other parties agree to or oppose the extension. A timely request for an extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

FILING INSTRUCTIONS

A petition for administrative hearing must be filed with the Office of the District Clerk. Filings with the Office of the District Clerk may be made by mail, hand-delivery, or e-mail. Filings by facsimile will not be accepted. A petition for administrative hearing or other document is deemed filed upon receipt during normal business hours by the Office of the District Clerk at the District's headquarters in West Palm Beach, Florida. The District's normal business hours are 8:00 a.m. – 5:00 p.m., excluding weekends and District holidays. Any document received by the Office of the District Clerk after 5:00 p.m. shall be deemed filed as of 8:00 a.m. on the next regular business day.

Additional filing instructions are as follows:

- Filings by mail must be addressed to the Office of the District Clerk, 3301 Gun Club Road, West Palm Beach, Florida 33406.
- Filings by hand-delivery must be delivered to the Office of the District Clerk. Delivery of a petition to the District's security desk does not constitute filing. It will be necessary to request that the District's security officer contact the Office of the District Clerk. An employee of the District's Clerk's office will receive and process the petition.
- Filings by e-mail must be transmitted to the Office of the District Clerk at clerk@sfwmd.gov. The filing date for a document transmitted by electronic mail shall be the date the Office of the District Clerk receives the complete document.

INITIATION OF ADMINISTRATIVE HEARING

Pursuant to Sections 120.54(5)(b)4. and 120.569(2)(c), Florida Statutes, and Rules 28-106.201 and 28-106.301, Florida Administrative Code, initiation of an administrative hearing shall be made by written petition to the District in legible form and on 8 1/2 by 11 inch white paper. All petitions shall contain:

1. Identification of the action being contested, including the permit number, application number, District file number or any other District identification number, if known.
2. The name, address, any email address, any facsimile number, and telephone number of the petitioner, petitioner's attorney or qualified representative, if any.
3. An explanation of how the petitioner's substantial interests will be affected by the agency determination.
4. A statement of when and how the petitioner received notice of the District's decision.
5. A statement of all disputed issues of material fact. If there are none, the petition must so indicate.
6. A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the District's proposed action.
7. A statement of the specific rules or statutes the petitioner contends require reversal or modification of the District's proposed action.
8. If disputed issues of material fact exist, the statement must also include an explanation of how the alleged facts relate to the specific rules or statutes.
9. A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the District to take with respect to the District's proposed action.

MEDIATION

The procedures for pursuing mediation are set forth in Section 120.573, Florida Statutes, and Rules 28-106.111 and 28-106.401–.405, Florida Administrative Code. The District is not proposing mediation for this agency action under Section 120.573, Florida Statutes, at this time.

RIGHT TO SEEK JUDICIAL REVIEW

Pursuant to Section 120.68, Florida Statutes, and in accordance with Florida Rule of Appellate Procedure 9.110, a party who is adversely affected by final District action may seek judicial review of the District's final decision by filing a notice of appeal with the Office of the District Clerk in accordance with the filing instructions set forth herein within 30 days of rendition of the order to be reviewed, and by filing a copy of the notice with the appropriate district court of appeals via the Florida Courts E-Filing Portal.

Notice of Coverage under the Generic Permit for Discharge of Ground Water from Dewatering Operations

Collier County Board of County Commissioners
Matthew McLean
Division Director
329 Tamiami Trail East, Suite 303
Naples, Florida 34112
Matthew.McLean@colliercountyfl.gov

Re: 98th/99th & 105th/106th Avenue
North, Naples Park Infrastructure
Improvements Project
Naples Park, 98th/99th & E
105th/106th Ave. N
Naples, Florida 341122
Collier County

Permit Number: FLG073396
File Number: FLG073396-001-IWD
Issuance Date: August 3, 2022
Effective Date: August 3, 2022
Expiration Date: August 2, 2027

Dear Mr. McLean,

Notice of Coverage

In response to your request for coverage under the Generic Permit for Discharge of Ground Water from Dewatering Operations for the above referenced site, dated May 09, 2022, the Department of Environmental Protection hereby grants your request effective on date listed above. Use of the Generic Permit is valid until the expiration date listed above. Please refer to the permit number in all correspondence or permit. The permit number may also be used to find files electronically in DEP Electronic Document Management System (Oculus) Wastewater Catalog.

The 98th/99th and 105th/106th Avenue North Naples Park infrastructure improvements project area is located within Section 28, Township 48 South, Range 25 East, Collier County, Florida. The project area is generally bounded to the west by Vanderbilt Drive and to the east by US Highway 41 (Tamiami Trail N). Dewatering for the 98th/99th and 105th/106th Avenue North project areas will utilize the existing stormwater swale system to maintain effluent discharge near the area of dewatering to the maximum extent possible. Where necessary, dewatering effluent may be directed off-site via the existing stormwater discharge system to outfall structures associated with the Vanderbilt Channel and the 8th Street North stormwater management system which ultimately enters the stormwater management lakes located on the north side of 111th Avenue North at 108th Street North. The 98th/99th and 105th/106th Avenue North project area covers three stormwater drainage basins (Naples Park West Basin, Naples Park North Basin and Naples Park South Basin). Stormwater drainage for these basins is typically directed to the outfall locations associated with the Vanderbilt Channel for portions west of 7th Street North and to the 8th Street North stormwater system for areas east of 7th Street North.

Review of the Florida Department of Environmental Protection (FDEP) Map Direct: Contamination Locator website and database indicates an identified site with potential contamination for chlorinated hydrocarbons associated with the One Hour Dry Cleaners facility (FDEP Facility ID: ERIC_4288). The facility is located southwest of the intersection of 99th Avenue North and US Highway 41 and is currently listed as “On Hold” cleanup status for contamination of soils reported on June 26, 1997. The facility retains eligibility for state-administered cleanup under the Dry-Cleaning Solvent Cleanup Program and pending rehabilitation. To aid in the prevention of the migration of potential groundwater contaminants, no dewatering is proposed within 500 feet of the One Hour Dry Cleaners facility.

A copy of the Generic Permit, DEP Document 62-621.300(2)(a) and a copy of Rule 62-621.300(2), Florida Administrative Code (F.A.C.) are enclosed. Please review the permit to become familiar with the permit and any reporting requirements for which you may be responsible. All correspondence and inquiries shall be submitted to this office via the email address in the letterhead above.

Appropriate site-specific Best Management Practices (BMPs) must be implemented upon commencement of the discharge under this Generic Permit.

Pursuant to Part III of the Generic Permit, to terminate permit coverage you shall submit DEP Form 62-621.300(2)(f), Notice of Termination Generic Permit for Discharge of Ground Water from Dewatering Operations (attached) to this office within 14 days after completion of the discharge activity or upon expiration of coverage, whichever occurs first. For your convenience, a blank form has been attached. Electronic submittal is preferred and is available at the [DEP Business Portal](#). **All notices of termination submitted after December 21, 2020 shall be submitted electronically.**

This generic permit does not relieve the permittee from the responsibility for obtaining any other permits required by the Department or any federal, state or local agency, including Municipal Separate Storm Sewer Systems (MS4) Permittees (i.e. Florida Department of Transportation and local governments).

If you have any questions or comments regarding coverage under this Generic Permit, please contact Gabriella Giliberti at (239) 344-5629 or Gabriella.Giliberti@FloridaDEP.gov.

NOTICE OF RIGHTS

This action is final and effective on the date filed with the Clerk of the Department unless a petition for an administrative hearing is timely filed under Sections 120.569 and 120.57, F.S., before the deadline for filing a petition. On the filing of a timely and sufficient petition, this action will not be final and effective until further order of the Department. Because the administrative hearing process is designed to formulate final agency action, the hearing process may result in a modification of the agency action or even denial of the application.

Petition for Administrative Hearing

A person whose substantial interests are affected by the Department’s action may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. Pursuant to Rules 28-106.201 and 28-106.301, F.A.C., a petition for an administrative hearing must contain the following information:

- (a) The name and address of each agency affected and each agency’s file or identification number, if known;
- (b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner’s representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner’s substantial interests will be affected by the agency determination;

- (c) A statement of when and how the petitioner received notice of the agency decision;
- (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
- (e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action;
- (f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
- (g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

The petition must be filed (received by the Clerk) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@dep.state.fl.us . Also, a copy of the petition shall be mailed to the applicant at the address indicated above at the time of filing.

Time Period for Filing a Petition

In accordance with Rule 62-110.106(3), F.A.C., petitions for an administrative hearing by the applicant and persons entitled to written notice under Section 120.60(3), F.S., must be filed within fourteen days of receipt of this written notice. Petitions filed by any persons other than the applicant, and other than those entitled to written notice under Section 120.60(3), F.S., must be filed within fourteen days of publication of the notice or within fourteen days of receipt of the written notice, whichever occurs first. You cannot justifiably rely on the finality of this decision unless notice of this decision and the right of substantially affected persons to challenge this decision has been duly published or otherwise provided to all persons substantially affected by the decision. While you are not required to publish notice of this action, you may elect to do so pursuant Rule 62-110.106(10)(a), F.A.C.

The failure to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the discretion of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C. If you do not publish notice of this action, this waiver may not apply to persons who have not received a clear point-of entry.

Extension of Time

Under Rule 62-110.106(4), F.A.C., a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@dep.state.fl.us, before the deadline for filing a petition for an administrative hearing. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

Mediation

Mediation is not available in this proceeding.

Judicial Review

Once this decision becomes final, any party to this action has the right to seek judicial review pursuant to Section 120.68, F.S., by filing a Notice of Appeal pursuant to Florida Rules of Appellate Procedure 9.110 and 9.190 with the Clerk of the Department in the Office of General Counsel (Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida 32399-3000) and by filing a copy of the Notice of Appeal accompanied by the

applicable filing fees with the appropriate district court of appeal. The notice must be filed within 30 days from the date this action is filed with the Clerk of the Department.

EXECUTION AND CLERKING

Executed in Orlando, Florida.

Generic Permit

For

Discharge Of

Ground Water From

Dewatering Operations

Effective Date: 02/2015

This permit is issued under the provisions of Section 403.0885, Florida Statutes, and applicable rules of the Florida Administrative Code. Coverage under this permit constitutes authorization to discharge to waters of the State pursuant to the Department's federally-approved National Pollutant Discharge Elimination System (NPDES) program. Until coverage under this permit is terminated, revoked or expires, permittees using this generic permit are authorized to discharge ground water from dewatering operations to surface waters of the State in accordance with the terms and conditions of this permit

Part I. Authorization to Discharge

Coverage under this generic permit constitutes authorization to discharge ground water from a dewatering operation through a point source to surface waters of the State. Until coverage under this permit is terminated, revoked or expires, permittees using this permit are authorized to discharge ground water in accordance with the terms and conditions of this permit.

Part II. Definitions

For the purposes of this permit, the following terms have the following meanings unless the context clearly indicates otherwise:

- A. "Bypass" means the intentional diversion of waste streams from any portion of the treatment system.
- B. "Dewatering operations" means temporarily lowering the water table by draining or pumping of ground water from activities such as excavations, building foundations, vaults, trenches and aquifer performance tests for exploratory purposes.
- C. "Ground water" means water beneath the surface of the ground within a zone of saturation, whether or not flowing through known and definite channels.
- D. "Point source" means any discernible, confined, and discrete conveyance, including any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture or agricultural stormwater runoff.
- E. "Surface Waters" means those waters defined in Section 403.031(13), F.S., excluding underground waters.
- F. "Upset" means an exceptional incident in which there is unintentional and temporary noncompliance with technology-based effluent limitations because of factors beyond the reasonable control of the permittee.
 - (1) An upset does not include noncompliance caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, careless or improper operation.
 - (2) An upset constitutes an affirmative defense to an action brought for noncompliance with technology-based permit effluent limitations if the requirements of upset provisions of Rule 62-620.610, F.A.C., are met.

Part III. General Provisions

- A. Coverage under this permit
 - 1. Discharges from dewatering operations are limited to a term not to exceed 5 years from the effective date of coverage.
 - 2. Coverage under this generic permit shall be effective upon notification by the Department in accordance with Rule 62-621.101, F.A.C.
 - 3. To terminate coverage under this generic permit the permittee shall submit a Notice of Termination (DEP Form 62-621.300(2)(f)), to the appropriate Department district office within 14 days after completion of the discharge activity or upon expiration of coverage, whichever occurs first. Electronic submittal is preferred and may be available at <http://www.dep.state.fl.us/water/wastewater/iw/iw-forms.htm>.
- B. Effluent Limitations

1. Discharge of ground water from dewatering operations shall be limited and monitored by the permittee as specified below

Parameter	Units	Discharge Limitation	Monitoring Frequency	Sample Type
Flow*	gallons per day	Report	1/week when discharging	Actual or Estimated

* The flow rate shall not exceed the design flow rate of the sediment control measure employed.

Part IV. Best Management Practices

A. Implementation of Best Management Practices

- 1 The permittee shall develop and implement site specific control measures (Best Management Practices) to minimize or eliminate pollutant discharges resulting from dewatering operations to surface waters of the State. Appropriate BMPs shall have been developed and must be implemented upon commencement of the discharge. The most common BMPs for sediment control include sediment traps and basins, weir and dewatering tanks, filters, and chemical treatment. These technologies and approaches provide a number of options to achieve sediment removal. The sizes of the particle that make up the sediments are a key consideration in selecting sediment control options. A description of the most common types of sediment control technologies are provided below along with design considerations of each. Appendix II of the State of Florida Erosion and Sediment Control Designer and Reviewer Manual 2013 is available online to provide technical guidance in the development and implementation of BMPs for sediment control at:

- <http://www.stormwater.ucf.edu/publications/2013RevisedDesignerManual.pdf> or,
- <http://www.flrules.org/Gateway/reference.asp?No=Ref-04227>.

(a) Sediment Traps and Basins:

- Sediment traps and basins are temporary earthen basins formed by the excavation and/or construction of an embankment to detain runoff containing sediment and allow sediments to settle out before discharging.
- Sediment traps are generally smaller than sediment basins and usually have flume outlets covered with rock or vegetation to control erosion. The larger sediment basins are designed with some type of control release structure (weir) and usually discharge through a pipe.
- Sediment traps and basins are effective for the removal of large and medium-size particles (sand and gravel) and some metals that settle out with the sediment particles. Sediment basins can also be effective at removing smaller silt particles.
- Design flow rates are 25 to 500 gpm.

(b) Weir and Dewatering Tanks

- Weir tanks use a series of over-flow and under-flow weirs to maximize the residence time in the tank and achieve efficient settling and removal of sediments including gravel, sand, silt and metals (with the removed sediment). Some oil and grease can be removed by capture behind under-flow weirs. Design flow rates are 60 to 100 gpm.
- Dewatering tanks are equipped with a fabric filter. Water flow enters the tank through the top, passes through the filter, and is discharges through the bottom of the tank. These tanks are

effective for the removal trash, gravel, sand, silt, some visible oil and grease, and some metals (removed with the sediments). Design flow rates vary.

(c) Filters (Gravity Filter Bags, Sand Media Filters, Pressurized Bag and Cartridge Filters)

- A gravity filter bag is a square or rectangular bag made of nonwoven geotextile fabric that filters out and removes sediments including gravel, sand, and silt. Some metals are removed with the sediment. Water is pumped into one side of the bag and seeps through the bottom and sides of the bag. A secondary barrier, such as a rock filter bed or geobarrier, is placed beneath and beyond the edges of the bag to capture sediments that escape the bag. Design flow rates are 300 to 800 gpm.
- Sand media filters are metal canisters filled with sand media used for filtering out trash, gravel, sand, silt and some metals as well as the reduction of Biochemical Oxygen Demand (BOD) and turbidity. Generally, sand filters provide a final level of treatment. They are often used as a secondary or higher level of treatment after a significant amount of sediment and other pollutants has been removed using other methods. Design flow rates are 80 to 1000 gpm.
- Pressurized bag filter units are composed of single-filter bags made from polyester felt material. The water filters through the unit and is discharged through a common header. Some units include a combination of bag filters and cartridge filters for enhanced contaminant removal. Pressurized bag filters are effective for the removal of sand, silt, some clays, and some metals, as well as the reduction of BOD and turbidity. Design flow rates are 50 to 1000 gpm.
- Cartridge filter units come with various cartridge configurations or with a larger single-cartridge filtration unit (with multiple filters within). They provide a high degree of pollutant removal. They are often used as a secondary or higher polishing level of treatment after a significant amount of sediment and other pollutants is removed. Cartridge filters are effective for the removal of sand, silt, some clays, and some metals, as well as the reduction of BOD and turbidity. Design flow rates are 50 to 1000 gpm.

Note: Backwash water should be managed such that it is not discharged directly to waters of the State. Backwash water may be hauled away for proper disposal or returned to the beginning of the treatment process.

(d) Chemical Treatment

- Chemical treatment includes the addition of carefully selected chemicals such as polymers (e.g., polyacrylamide, PAM), alum, or other flocculants to water to aid in the reduction of turbidity by the removal of smaller particulates such as clay and fine silt. Chemical treatment should be considered where turbid discharges to surface waters cannot be avoided using other available BMPs and turbidity needs to be reduced to levels less than the water quality standard of 29 nephelometric turbidity units (NTUs) above background.
- The design of and operation of a chemical treatment systems shall consider the factors that determine the most optimum, cost-effective performance. Factors to consider include the following:
 - The right chemical used at the right dosage. There is usually an optimum dosage rate which can be determined by bench testing the chemical at a range of dosage concentrations. Chemical use shall be designed to ensure they do not cause or contribute to water quality standards violations.
 - The flocculant shall be mixed rapidly into the water to ensure proper dispersion and floc formation. Sufficient flocculation might occur in the pipe leading from the point of chemical addition to the settling basin.
 - The withdrawal system shall be designed to minimize outflow velocities and to prevent floc discharge. If possible, the discharge shall be directed through a physical filter such as a vegetated swale to catch any unintended floc discharge.

- A pH-adjusting chemical shall be added, if needed, to control pH.
- Treatment systems can be designed as flow-through continuous or batch-treatment systems.
- Treatment chemicals shall be approved by FDEP for potable water use.
- Primary sediment basins or grit pits may be required if the water to be treated has a high percentage of suspended solids. This will prevent the heavy solids load from impacting the performance of the downstream chemical treatment system.

B. Inspection and Maintenance

1. Visual inspections of earthen embankments and discharge flumes or swales shall be performed to prevent washout, scouring, and embankment blowouts. Areas subject to erosion shall be grassed or covered with some type of erosion control material.
2. Sediments accumulated in sediment traps and basins shall be removed as necessary to maintain treatment efficiency. Sediments removed during the maintenance of a dewatering device shall be handled in accordance with the BMPs developed for the site.
3. Periodic cleaning of tanks and associated piping and equipment shall be performed based on visual inspection or reduced flow.
4. Gravity filter bags shall be inspected for proper performance at a reasonable frequency based on amount of use. The bag shall be replaced when it no longer filters sediments or passes water at a reasonable rate.
5. Filters shall be operated and maintained in accordance with manufacturer's recommendation especially with respect to cleaning, backwashing, and replacing overused filter media to ensure an acceptable level of efficiency.
6. The permittee shall maintain records of weekly inspections and maintenance activities required to maintain treatment efficiency.

PART V. Recordkeeping Requirements

The permittee shall maintain the following records and make them available for inspection on the permitted site unless the permittee identifies another location on DEP Form 62-621.300(2)(b).

- A. Records of all data, including reports and documents, used to complete the Notice of Intent requesting coverage under the permit for at least 3 years from the date the Notice of Intent was filed.
- B. Records of flow monitoring as required in Part III.B.1., records of chemicals used for treatment, if any, and records of inspections and maintenance activities identified in Part IV.B.6. of this generic permit for at least 3 years from the date the record was created.
- C. Copy of the permit.
- D. Copy of coverage issued by the Department.

PART VI. Other Conditions

- A. The discharge authorized by this permit shall not cause a violation to surface water quality standards.
- B. The permittee shall report any characteristic in the effluent that could indicate the presence of a pollutant or pollutants not previously identified or anticipated, (e.g., visible oil sheen, odor), and the occurrence, or new knowledge of, any spills, leaks or contamination in the vicinity of the project that could impact the water quality of the effluent. Reporting procedures are listed in Part VII.I. of this permit.
- C. If contamination in the vicinity of the site that causes or contributes to violations of water quality standards is encountered, the permittee shall cease dewatering operations and contact the Department.

The site may qualify for coverage under Rule 62-621.300(1), F.A.C., or under an individual permit under Rule 62-620, F.A.C.

- D. The discharge shall not include visible floating solids or foam; or cause or contain components that settle to form putrescent deposits or float as debris, scum, oil, or other matter in such amounts as to form nuisances, produce color, odor, taste or turbidity, in accordance with Rule 62-302.500(1)(a), F.A.C.
- E. When requested by the Department, the permittee shall provide any information required by law which is needed to determine whether there is cause for revoking and reissuing, or terminating coverage under this permit, or to determine compliance with the permit. The permittee shall also provide to the Department, upon request, copies of records required by this permit to be kept. If the permittee becomes aware of relevant facts that were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be submitted or corrections reported to the Department within 10 days of discovery.
- F. Coverage under this permit may be suspended, revoked and reissued, or terminated in accordance with Rule 62-620.345, F.A.C., if the Secretary determines that there has been a violation of any of the terms or conditions of the permit, there has been a violation of state water quality standards or the permittee has submitted false, incomplete or inaccurate data or information.

PART VII. General Conditions

- A. The terms, conditions, requirements, limitations and restrictions set forth in this permit are binding and enforceable pursuant to Chapter 403, F.S. Any permit noncompliance constitutes a violation of Chapter 403, F.S., and is grounds for enforcement action, permit termination, permit revocation and reissuance. [62-620.610(1), F.A.C.]
- B. As provided in Section 403.087(7), F.S., the issuance of this permit does not convey any vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor authorize any infringement of federal, state, or local laws or regulations. This permit is not a waiver of or approval of any other Department permit or authorization that may be required for other aspects of the total project which are not addressed in this permit. [62-620.610(3), F.A.C.]
- C. This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title. [62-620.610(4), F.A.C.]
- D. This permit does not relieve the permittee from liability and penalties for harm or injury to human health or welfare, animal or plant life, or property caused by the construction or operation of this permitted source; nor does it allow the permittee to cause pollution in contravention of Florida Statutes and Department rules, unless specifically authorized by an order from the Department. The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. [62-620.610(5), F.A.C.]
- E. The permittee shall at all times properly operate and maintain the facility and systems of treatment and control, and related appurtenances, that are installed and used by the permittee to achieve compliance with the conditions of this permit. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to maintain or achieve compliance with the conditions of the permit. [62-620.610(7), F.A.C.]

- F. The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, including an authorized representative of the Department and authorized EPA personnel, when applicable, upon presentation of credentials or other documents as may be required by law, and at reasonable times, depending upon the nature of the concern being investigated, to:
1. Enter upon the permittee's premises where a regulated facility, system, or activity is located or conducted, or where records shall be kept under the conditions of this permit;
 2. Have access to and copy any records that shall be kept under the conditions of this permit;
 3. Inspect the facilities, equipment, practices, or operations regulated or required under this permit; and
 4. Sample or monitor any substances or parameters at any location necessary to assure compliance with this permit or Department rules.
- [62-620.610(9), F.A.C.]
- G. In accepting this permit, the permittee understands and agrees that all records and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the Florida Statutes or Department rules, except as such use is prescribed by Section 403.111, F.S., or Rule 62-620.302, F.A.C. Such evidence shall only be used to the extent that it is consistent with the Florida Rules of Civil Procedure and applicable evidentiary rules. [62-620.610(10), F.A.C.]
- H. This permit is transferable only upon Department approval in accordance with Rule 62-620.340, F.A.C. The permittee shall be liable for any noncompliance of the permitted activity until the transfer is approved by the Department. [62-620.610(14)]
- I. The permittee shall report to the Department any noncompliance which may endanger health or the environment. Any information shall be provided orally within 24 hours from the time the permittee becomes aware of the circumstances. A written submission shall also be provided within five days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance including exact dates and time, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance.
1. The following shall be included as information which must be reported within 24 hours under this condition:
 - (a) Any unanticipated bypass which exceeds any effluent limitations in the permit,
 - (b) Any upset which exceeds any effluent limitation in the permit,
 - (c) Violation of a maximum daily discharge limitation for any of the pollutants specifically listed in the permit, if applicable, and
 - (d) Any unauthorized discharge to surface or ground waters.
 2. Oral reports as required by this subsection shall be provided as follows:
 - (a) For unauthorized releases or spills of treated or untreated groundwater from dewatering operations reported pursuant to subparagraph 1.(d) that are in excess of 1,000 gallons per incident, or where information indicates that public health or the environment will be endangered, oral reports shall be provided to the Department by calling the STATE WARNING POINT TOLL FREE NUMBER (800) 320-0519, as soon as practical, but no later than 24 hours from the time the permittee becomes aware of the discharge. The permittee, to the extent known, shall provide the following information to the State Warning Point:
 - (1) Name, address, and telephone number of person reporting;
 - (2) Name, address, and telephone number of permittee or responsible person for the discharge;
 - (3) Date and time of the discharge and status of discharge (ongoing or ceased);
 - (4) Characteristics of the spill or release (untreated or treated);

- (5) Estimated amount of the discharge;
 - (6) Location or address of the discharge;
 - (7) Source and cause of the discharge;
 - (8) Whether the discharge was contained on-site, and cleanup actions taken to date;
 - (9) Description of area affected by the discharge, including name of water body affected, if any; and
 - (10) Other persons or agencies contacted.
- (b) Oral reports, not otherwise required to be provided pursuant to subparagraph 2.(a) above, shall be provided to the Department within 24 hours from the time the permittee becomes aware of the circumstances.
3. If the oral report has been received within 24 hours, the noncompliance has been corrected, and the noncompliance did not endanger health or the environment, the Department shall waive the written report.

[62-620.610(20), F.A.C.]

J. Bypass Provisions.

1. Bypass is prohibited, and the Department may take enforcement action against a permittee for bypass, unless the permittee affirmatively demonstrates that:
- (a) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage; and
 - (b) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and
 - (c) The permittee submitted notices as required under General Condition J.2. of this permit.
2. If the permittee knows in advance of the need for a bypass, it shall submit prior notice to the Department, if possible at least 10 days before the date of the bypass. The permittee shall submit notice of an unanticipated bypass within 24 hours of learning about the bypass as required in General Condition I. of this permit. A notice shall include a description of the bypass and its cause; the period of the bypass, including exact dates and times; if the bypass has not been corrected, the anticipated time it is expected to continue; and the steps taken or planned to reduce, eliminate, and prevent recurrence of the bypass.
3. The Department shall approve an anticipated bypass, after considering its adverse effect, if the permittee demonstrates that it will meet the three conditions listed in General Condition J.1.(a) through (c) of this permit.
4. A permittee may allow any bypass to occur which exceeds effluent limitations in the permit if it is for essential maintenance to assure efficient operation. These bypasses are not subject to the provision of General Condition J.1. through 3. of this permit.

[62-620.610(22), F.A.C.]

K. Upset Provisions.

1. A permittee who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:
- (a) An upset occurred and that the permittee can identify the cause(s) of the upset;
 - (b) The permitted facility was at the time being properly operated;
 - (c) The permittee submitted notice of the upset as required in General Condition I. of this permit; and
 - (d) The permittee complied with any remedial measures required under General Condition D of this permit.
2. In any enforcement proceeding, the burden of proof for establishing the occurrence of an upset rests with the permittee.

3. Before an enforcement proceeding is instituted, no representation made during the Department review of a claim that noncompliance was caused by an upset is final agency action subject to judicial review.
[62-620.610(23), F.A.C.]

Rule 62-621.300(2), F.A.C. Generic Permit for Discharge of Ground Water from Dewatering Operation.

(2) Generic Permit for Discharge of Ground Water from Dewatering Operations.

(a) The document “Generic Permit for Discharge of Ground Water from Dewatering Operations,” document number 62-621.300(2)(a), issued by the Department and effective February 10, 2015, is hereby adopted and incorporated by reference. This document may be obtained by contacting either the local Department District Office, by writing to the Department of Environmental Protection, Industrial Wastewater Program, Mail Station #3545, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, from the Department’s website or from <http://www.flrules.org/Gateway/reference.asp?No=Ref-04262>.

(b) Form 62-621.300(2)(b), Notice of Intent to Use the Generic Permit for Discharge of Ground Water from Dewatering Operations, (NOI), effective February 10, 2015, is hereby adopted and incorporated by reference. This form may be obtained by either contacting the local Department District Office, by writing the Department of Environmental Protection, Industrial Wastewater Program, Mail Station #3545, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, or from the Department’s website or from <http://www.flrules.org/Gateway/reference.asp?No=Ref-04263>.

(c) Applicability and Coverage.

1. Coverage under this generic permit is available for discharge of ground water from dewatering operations to surface waters of the State, provided all criteria specified in this generic permit are met. Applicants seeking coverage under this permit shall submit a Notice of Intent to Use the Generic Permit for Discharge of Ground Water from Dewatering Operations, DEP Form 62-621.300(2)(b) as specified in that form. The permittee shall meet the effluent limitations and requirements specified in this generic permit.

2. This generic permit authorizes the discharge of ground water from dewatering operations through a point source to surface waters of the State under the State’s Federally-approved NPDES program only and does not relieve the permittee of the responsibility of obtaining any other federal, state, or local government permit.

3. For the purposes of this section, ‘dewatering operations’ means temporarily lowering the water table by draining or pumping of ground water from activities such as excavations, building foundations, vaults, trenches and aquifer performance tests for exploratory purposes.

4. Beginning (February 10, 2015) dewatering operations as defined herein seeking coverage under the NPDES Generic Permit for Stormwater Discharges from Large and Small Construction Activities under subsection 62-621.300(4), F.A.C, are not required to obtain separate coverage under this permit.

5. Coverage under this generic permit shall not be effective until the applicant receives written notification from the Department.

(d) Discharges of ground water from dewatering operations are limited to a term not to exceed five years from the effective date of coverage.

(e) Requests for Coverage.

1. Requests for coverage under this generic permit shall be submitted at least 14 days prior to the planned commencement of discharge, to the industrial wastewater program at the local DEP office. Electronic submittal is preferred and may be available at the DEP Business Portal. The submission shall include the following: Completed Notice of Intent to Use Generic Permit for Discharge of Ground Water from Dewatering Operations, DEP Form 62-621.300(2)(b) and applicable fee as indicated in the form. Prior to the submittal of the NOI, the applicant shall develop best management practices consistent with part IV of this generic permit (DEP Document 62-621.300(2)(a)), which shall be implemented upon commencement of discharge.

2. The permittee may request renewal of coverage under this generic permit by submitting DEP Form 62-621.300(2)(b) and applicable fee as indicated in the form at least 14 days before expiration of current coverage.

3. Request for transfer of ownership under this generic permit shall be submitted to the industrial wastewater program at the local DEP office using DEP Form 62-620.910(11) and a \$50.00 processing fee pursuant to rule 62-4.050, F.A.C.

4. There is no annual fee for sites authorized to discharge under this generic permit pursuant to rule 62-4.052, F.A.C.

5. Existing dewatering operations with current coverage under the Generic Permit for Discharge of Produced Ground Water From any Non-Contaminated Site Activity effective February 14, 2000, shall continue to meet the requirements of that permit unless the permittee elects to submit a complete DEP Form 62-621.300(2)(b), to convert to coverage under this generic permit.

(f) To terminate coverage under this generic permit the permittee shall submit DEP Form 62-621.300(2)(f). Notice of Termination Generic Permit for Discharge of Ground Water from Dewatering Operations effective February 10, 2015, which is hereby adopted and incorporated by reference. This form may be obtained by contacting the Florida Department

of Environmental Protection, Bob Martinez Center, Industrial Wastewater Program, Mail Station #3545, 2600 Blair Stone Road, Tallahassee, Florida
32399-2400 or from the Department's website, or from <http://www.flrules.org/Gateway/reference.asp?No=Ref-04264>.

**NOTICE OF TERMINATION
 GENERIC PERMIT FOR DISCHARGE
 OF GROUND WATER FROM DEWATERING OPERATIONS
 (subsection 62-621.300(2), F.A.C.)**

This Notice of Termination form shall be completed and submitted to the appropriate district office of the Department to terminate coverage under the Generic Permit for Discharges of Ground Water from Dewatering Operations. Electronic submittal is preferred and may be available at <http://www.dep.state.fl.us/water/wastewater/iw/iw-forms.htm>.

I. PERMIT NUMBER:

DEP Permit No : FLG

II. TERMINATION INFORMATION:

Reason for Termination:	
<input type="checkbox"/>	Dewatering project has been completed and/or discharge has ceased.
<input type="checkbox"/>	No longer operator of the site.
<input type="checkbox"/>	Site no longer qualifies for coverage under the Generic Permit for Discharges of Ground Water from Dewatering Operations.
<input type="checkbox"/>	Other reason(s):

III. PERMITTEE INFORMATION:

1. Name:		
2. Phone No.:		
3. Email Address:		
4. Street or P. O. Box:		
5. City or Town:	6. State:	7. Zip Code:

IV. CERTIFICATION¹:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
