Scope of Work

Collier County Public Utilities needs to replace approximately 2,000 feet of 40-year-old clay gravity sewer on Southbay Drive and Center Street which is within the One Naples development project limits. The existing pipe is beyond its anticipated service life. The Collier County Wastewater Division was planning replacement to prevent leaks, service outages and disruptions to the residents. The developer's contractor, Michell & Stark Construction Company, Inc. (M&S), needs to remove/replace the aging asbestos-cement water main in the same area as the One Naples project. The work must be coordinated concurrently with M&S water pipe replacement due to the proximity of both the water and sewer pipes. The drawings for the utility work and Right of Way (ROW) prepared by JR Evans depict the locations of all utilities in the project area. No roadway pavement or sidewalk restoration will be required under this Work Order.
